The Tragic One D Today

This is Our Article about The Condition of USA NOW and Specifically
The State of the Common Today in USA

It is Based on The Fact that: The Common in USA Today appears as

just One D

By One D we mean One Dimension (One D)
One D is like: flat, only appearance, surface level only

The Common is: The Collective group of the people, and the Ways and Ideas that They Share Together

If The Common Does appear as just one d: flat, only appearance, surface level only, then this sounds like it is very limited

This would be A Danger to The People so We Write This Article
