This is **My Lawsuit: The Error on Common**

It is About: **The Common**, which is The **Life** and **Ways** of the **People** in **USA**

I Think that The Common of USA Today is in **Bad Condition**

To **Announce** this **Fact** I Am **Submitting This Lawsuit: The Error on Common**

**The Condition of The Common Today**

Today in USA (United States of America) The Condition of The Common is:

poor, neglected, run down, in decay

There is **Decay** in The **Definition** of **The Common** Today in USA

The Common Today in USA is hard to **identify**

It is Hard to Identify The **Definition** of The **Common** Today in USA

Today in USA (United States of America) The Condition of The Common is:

poor, neglected, run down, in decay

**The Common By Definition**

**The Term The Common** is About The **Life** and **Ways** of the **People** in **USA**

The Common Needs **Identity** which is **A Definition**

The Common Needs Qualities, Attributes, Virtues and Descriptors

We Have to be Able to **Describe The Common**

The Common is **Not Dictated** by **The Press**

It is Hard to **Identify The Definition** of **The Common** Today in USA

Today in USA (United States of America) The Condition of The Common is:

poor, neglected, run down, in decay

So The **Common** in USA Today is in **Disarray**

## **About Disarray in The Common Today**

The **Common** Today in USA is hard to **identify**

If we try to **Describe** or **Identify The Common** Today in USA then:

The Common is in disarray, neglected, not cohesive, not very together

For example: Two **Big Factors** on **The Common** Today in USA are:

The **Mental Health system** and **Homelessness**

There are Many People from The Common **associated** with these Two Systems

The **Mental Health system** and **Homelessness**

These Two **Systems**, as **Big Factors** on The Common Today, **influence The Common**

**About The Mental Health system and The Homelessness**

The Mental Health system is about: **damnation** and **medication**

This is **Barbaric**

**Homelessness** shows **Disregard** for the **People**

These Two **Systems**, as **Big Factors** on The Common Today, **influence The Common**

There are at Least **90% of The People Associated** with These Two **Systems**

The **Mental Health system** and **Homelessness**

This **Shows** that **The Common** Today in USA is in **Disarray**

These Two **Systems**, as **Big Factors** on The Common Today, **influence The Common**

**A STATEMENT**

The **Condition** of **The Common** Today in USA is **Poor**

It **Appears** to be in **Disarray**: scattered, abstract, even shattered

It **Appears** that The **Condition** of **The Common** Today is By **Design of Government**

For example: The **Mental Health system** and **Homelessness** are:

By **Design of Government**

These Two **Systems**, as **Big Factors** on The Common Today, **influence The Common**

We can **See** This in **The Math** of it:

There are at Least **90% of The People Associated** with These Two **Systems**

The **Mental Health system** and **Homelessness**

These Two **Systems**, as Big **Factors** on The Common Today, **influence The Common**

It **Appears** that The **Condition** of **The Common** Today is By **Design of Government**

**About USA Common**

So, if **The Common** Today is in **Disarray**, and By **Design of Staff** (Government),

then This is **Neglect**

This **Neglect** of **The Common** by **Staff** is very **Different** than

**The Definition of The Common for USA**

USA, and USA Common, are about **300 Years Old**

The **Process** of **Progress** in USA has **Come Along** during The **300 Years**

**How** the **Process** of **Progress**: begins, starts, continues into completion is **Fact**

**The Common Needs**: Continuing, and Continuing by **Staff** (Government)

We **Need** The Common Around

The Common is The Life and Ways of the People in USA

We Need **Well Being** in **The Common** in USA

**The Point of Government**

The **Function** of **Government** is **Benefit** for the **People**

The People **want**: well being, security, protection

Government should **Guard** and **Protect** against Barbarians and Invaders

Government must **Care** about **The Common**

The Common Today is in **Disarray**

## **Symptoms of No Good Common**

The **Common** Today, which is in **Disarray**, is **No Good** – It will **Not Work**

The Two **Big Factors** that We **Mention** on The Common Today in USA are:

The **Mental Health system** and **Homelessness**

There are at Least **90%** of The **People Associated** with These Two **Systems**

The **Mental Health system** and **Homelessness**

In The **Mental Health system** in USA **The People** are:

**called** disabled, **labeled** mentally ill, isolated, medicated, harnassed **then**

strapped down, into even **hopeless**

**Hopeless** from **shock** and **continuing disbelief**, Caused by **Mandate**

The Mental Health system has **no definition** and is **not legal**

This is **worse** than abstract, not productive, not beneficial, no value

just **damnation** and actually **incarceration** by **police**

The **Police** are the **legs** of judges, psych doctors and even politicians

These Two **Systems**: The Mental Health system and Homelessness

are at minimal **90%** of the **People**

So **The Common** Today in USA is: in **disarray**, decay, abstract and

scattered by **Staff** (Government)

These are **The Descriptors** of **The Poor Common Today**

**Volitional Scattering** of the **People**, the **Populace**, by **Government**

This is **Police**, **Mental Health Staff** and **Judges**

**90%** of the **People** into The Mental Health system and Homelessness

This is **The No Good Common Today**

**FACTS:**

**The Common** Today is in **Disarray**, **not cohesive**, not sticking together

We **Do Not See A Cohesive Common** Today in **USA**

We **Need** The Common Around

The Common **Must Be** with integrity, whole, full, nourished, flourishing

We **Do Not See A Cohesive Common** Today in **USA**

In The Mental Health system The People are: **called** disabled, **then** mentally ill,

**then** given a diagnosis, **then** medication, a big dose usually

Also, The **No Good** is The **Homeless**: poor, deprived, cast out, shunned,

not cared for, not embraced, so **neglected**

The **Mental Health system** is Also **Neglected**

It has **no reason**, no **staff** with **knowledge** of mind, no **relationships**, no **treatment**,

no **actual** treatment, and no **treatment** for mental illness

The **Mental Health system** has **nothing** from **knowledge** of mind so **No Direction**

The Mental Health **Clients** are **setup**, and then **vulnerable** by psych doctors

with **police legs**

**The Common** Today in **USA** looks like a **Police State**

**The Common Looks Bad**

**Since** The Common Today in USA Looks **Bad**, then, **The Common Flunks**

It is **Not Good Enough** for **The Word Common**

**The Common** Today in **USA** is in **Disarray** so it is **Vulnerable**

This is **Danger**, like from **Birds of Prey**, like barbarians or invaders

**The Common** Today in USA is **Not Safe**

**The Common** in **USA** should have **Substance**

The Common **Needs** Qualities, Attributes, Virtues and Descriptors

We **Need** The Common Around

The Common **Must Be** with **integrity**, whole, full, nourished, flourishing

We **Do Not See A Cohesive Common** Today in **USA**

**The Term Culture** Needs **The Common** to be **Safe**

We Need **Well Being** in **The Common** in **USA** for **Culture**

**Culture in The Common**

The Common is **Not An Object**, but it is **organic**, with **life** and **vivid**

The Common **Needs Vivid** or **Vitality** for **Culture**

The Common **Needs** inspiration, circulation, freshness, some **constants**

For An **OK Common** We **Need** qualities, attributes, virtues of the **People**

We **Need** An **OK Common** for **Culture**

**COMPLAINT**

Since **The Common Today** in **USA** is **Neglected** and in **Disarray**, then

It is **Not Constant**, Flowing, nor, by Math, **Continuing**

The Common Seems **Vulnerable**, perhaps by **Design**, so **Dangerous**

**Government** is **Responsible** for **The Common**, Managing **The Common**

The Common is **Poor** and **Bad**, so This is **Negligence**

It is **So Bad** that it is **Criminal Negligence**, by **Design**, by **Deliberate**

**The Common** Today in **USA** is A **Deliberate Mess** by **Government**

That is **Criminal**

This **Poor Management** of **The Common** Today in **USA** is **My Lawsuit**

**The Error on Common**
