

About Modern Psychology

Author: Thomas Lloyd
TheEvenMind

This is My **Article**:

- **About Modern Psychology**

*It is **About**:*

*Psychology
Which is **Called**
A **Mind** Science*

People Have:

- A **Mind**
- Which We **Know**
- What **That** is

Every Person:

*Does **Manage**
His Own **Mind***

*When We **Do**:*

***Manage** Our Own **Mind**
Then
That is **Good***

However:

- Some People Like
- To **Intrude** On That

*Given **This**:*

***Intrusion** on Mind
There Has **Arisen**
The **Idea** of
Psychology*

Psychology:

*Which is **Called**
A **Mind** Science*

Psychology Around

In USA Today:

- We See **Around**
- The **Idea** of
- Psychology

*I Have **Noticed** This:*

Since The Late 1960's

According To:

- What We **See**
- The **Idea** of
- Psychology
- Is **Managed** By
- **Psych** Professionals

The Main example:

*Of **Psych** Professionals
Is **Psych** Doctor*

Many People Have:

- **Studied** The Psychology
- So We Can **Understand**
- The **Term**
- Psychologist

Generally:

*A Psychologist
Is **Related** To
The **Field** of
Psychology*

Many People Have:

***Studied** The Psychology
So We Can **Understand***

*The **Term**
Psychologist*

The Main example:

*Of **Psych** Professionals
Is **Psych** Doctor*

Psychology Practice

I Have **Said** that:

- In USA Today
- We See **Around**
- The **Idea** of
- Psychology

In:

*The Current **Day**
Psych **Setting**
Is **Around Us***

In:

- The Current **Setting**
- The **Idea** of
- Psychology
- Is **Practiced**

Usually:

*In The **Practice** of
Psychology
We **See**
Psych Professionals*

There Are:

- **Definitions** Agreed On
- In **Psych** Profession

So:

*If We **Examine**
Psychology **Definition**
We Can **See***

*Definitions Agreed On
In Psych Profession*

In USA Today:

*We See Around
The Idea of
Psychology*

In:

*The Current Day
Psych Setting
Is Around Us*

Psychology Definition

The **Practice** of Psychology:

- Has The
- **Definitions** Agreed On
- In **Psych** Profession

Generally:

*A Brief Description of
Psychology Definition*

Psychology **Definition:**

- Is the scientific **study** of
- The **mind** and **behavior**

This:

Includes
*How people
Think, feel, and act*

*A Brief Description of
Psychology Definition*

There May **Be:**

- A Few Things To
- **Think** About with
- Psychology **Definition**

*Is There A **Lot** of it
Can They Really **Know** Us
And
Where Did Psychology **Start***

Let's Have:

*A Quick **Look**
At These
Three **Questions***

Origin of Psychology

We See that:

- In USA Today
- We See **Around**
- The **Idea** of
- Psychology

And:

*We **Wonder** About
Where Did Psychology **Start***

So:

- The **Term**
- Psychology **Origins**

In:

*Psychology **Origins**
We Could **See**
Where Did Psychology **Start***

It is **Said** that:

- Psychology did not **emerge**
- Until the late 1800s

*At that **Time**:*

*The late 1800s
It Became **Seen** As
A **separate** discipline
Pg 5*

Yet:

*It is Also **Said** that
Early **history** can be
Traced back further*

Examples Are:

*Egypt, Greece, China
Persia and India*

In:

- Europe
- And on to USA
- Psychology did not **emerge**
- Until the late 1800s

*At that **Time**:*

*During the mid-1800s
Psychology **started to rise**
In **practice***

Early **Versions**:

- Of Psychology
- Were Rather **Experimental**

Afterall:

*It is **Hard**
To **Know The Mind***

Early **Explorers**:

- Of Psychology
- Tried **Crude** Methods
- To **Guess At**
- Human **Behavior**

Also:

*Sometimes Our **Thoughts**
Don't **Stay Around Long***

*Many People **Know:***

*A **Good Idea**
Should **Last Longer***

So:

- After the mid-1800s
- The Early **Versions**
- Of Psychology
- Were Rather **Experimental**

*Early **Explorers:***

*Of Psychology
Tried **Crude** Methods
To **Guess At**
Human **Behavior***

The Famous Pavlov

A Russian:

- Named Ivan **Pavlov**
- Was An
- Early **Explorer**
- Of Psychology

*He Was **Born** 1849*

So:

- **What** was Ivan **Pavlov**
- Best **known** for

*Ivan **Pavlov:***

*Introduced an **experiment**
Where he
Tested the **idea** of
Conditioned **reflex***

This is Generally like:

Reaction

In His Famous **Method**:

- **Pavlov**
- **Trained** a hungry **dog**
- To **salivate**
- At the **sound** of a
- Metronome or buzzer

*The **dog**:*

***Learned The Tone**
Metronome or buzzer*

*The **dog**:*

*Did **learn to salivate**
Because
Previously
The **Sound**
Had Been **associated** with
The **sight of food***

It is like:

***Salivate**
To **show** that
You are **hungry***

Salivate:

*To **show** that
You **want** food*

Early **Explorers**:

- Of Psychology
- Tried **Crude** Methods
- To **Guess** At
- Human **Behavior**

Second Example

Famous Sigmund **Freud**

*Many Have **Heard** of:*

*Sigmund **Freud**
Pg 8*

Freud is Considered:

*The **Father**
Of Modern **Day**
Psychology*

Sigmund Freud:

- Was An **Austrian**
- Called a physician

***Born** 1856:*

*He **Explored**
Early Psychology*

***Freudian** Psychology:*

***Came** from Him*

His Theory is Described:

- Where unconscious **conflicts**
- Like
- Between body and mind
- Become **extreme** or **unbalanced**

*Since **Freud:***

*Was **Austrian**
It is **Hard To Know**
A **Big** World Out **There***

*Many peoples
Many places
Many **ways** to interpret
Or manifest*

If A Person:

*Is **Peaceful**
Then
That Cannot **Bother** Others*

Freudian Psychology:

- Is Famous for
- **Introducing**
- The I Thought

*This He **Termed:***

Ego

This is Like:

*The **Individual***

Freud **Posed:**

- Three **Versions**
- Of
- The I Thought

id

ego

super ego

Even with:

*Three **Versions***

The I Thought

*Is **Abstract To Grasp***

Afterall:

Many peoples

Many places

*Many **ways** to interpret*

Or manifest

Freudian Psychology:

- Is Famous for
- **Introducing**
- The I Thought

Freud:

Invented

*The **Idea** of*

*Mental **Illness***

Btw:

- In 1939
- While **Present** in England
- **Freud**

- **Condemned** The Queens
- **Mother** in Law
- As Mentally **Ill**

Omg

Freudian Psychology:

*Is **Practiced**
In USA Today*

*It is **About:***

*The I Thought
Like
The **Individual***

So:

- We **Wonder** About
- **Where** Did Psychology **Start**

Origins of Psychology:

*The Early **Explorers**
Like
Pavlov and Freud*

Omg

Modern Day Psychology

Well:

- We **Remember**
- In USA Today
- We See **Around**
- The **Idea** of
- Psychology

*I Have **Noticed** This:*

*Since The Late 1960's
The **Practice** of
Psychology*

Pg 11

According To:

- What We **See**
- The **Idea** of
- Psychology
- Is **Managed** By
- **Psych** Professionals

In:

*Modern Day **Psychology**
There Are Many
Sub-fields*

These Are:

*Different **Angles**
Of **Viewing**
Or **Approaching**
Science of **Mind***

*We May Have
Heard of Some*

Examples Are:

*Neuropsychology
Evolutionary psychology
Industrial-organizational psychology
Clinical and counseling psychology
School psychology*

Omg:

- This Seems
- So **Thick**

*When I **Think:***

*Of Psychology
I **Wonder**
Is There Any
Room for **Me**
Omg*

*This Seems
So **Thick***

In:

*Modern Day **Psychology**
There Are Many
Sub-fields*

These **Groups:**

- **Study**
- Or **Claim** To Study
- **Processes**

Processes Are:

*Like
Things That We Do*

Gosh:

*Do They **Have**
Any **Ideas** of Their Own*

Examples of **Processes:**

- Behavioral
- Cognitive (creation)
- Intuitive (interpret)

*This Gets **Called:***

***Study** of
Observed behaviors*

*It Seems **Stale***

A Few More Examples

We Have **Seen:**

- Modern Day **Psychology**
- Has Many
- **Sub-fields**

One example

Neuropsychology

Pg 13

Neuropsychology:

- Would **Specialize** in
- **Assessing** and **treating**
- **Conditions** related to
- The **nervous** system

Neuro is Nerve

First of All:

We **Know** that
It is **Hard To Know**
The **nervous** system

Neuropsychology:

- Might **Study**
- ADHD

So:

What Is ADHD

ADHD **stands** for:

- Attention deficit hyperactivity disorder

Whoa:

Hard To Guess

ADHD:

- From Neuropsychology
- Is **Called**
- A **medical** condition

ADHD Definition States:

*A person with ADHD
Has **differences** in
Brain **development** and
Brain **activity***

This Would:

- Affect **attention**
- Like

- **Ability** to sit still
- Or **self-control**

It Sounds Like:

Calling

Preoccupied

Guilty

Omg

*Is **Boredom** ADHD:*

Omg

Neuropsychology:

*Also **Studies***

Stroke

More Neuropsychology

Another **Definition:**

- Neuropsychology is
- A **branch** of psychology
- That **studies**
- Physiological **processes** of
- The **nervous** system

*We **Know** that:*

*It is **Hard To Know***

*The **nervous** system*

Neuropsychology:

- Relates
- The **nervous** system **processes**
- To **behavior** and **cognition**

*They **Imply:***

How We Act

And Create

*Like **interpret***

*Derives from **Nerves***

Pg 15

Sometimes:

I Never Get Nervous

Neuropsychology **Thinks:**

- **Nerves** affect
- Both **normal** functions and
- **Dysfunctional** processes
- Associated with
- **Brain damage**

*Really **Hard To Know:***

*The Neuropsychology
Whoa*

*They Are So **Quick:***

*To **Call** Something
Brain damage*

A Fun Example

In **Most** examples:

- The Psychology
- Seems So **Heavy**
- Like
- **Weighing** A Lot

Yet:

*A **Fun** Example*

The Psychologists:

- Are Sometimes **hired**
- By The **sports** teams

The Psychologists:

*Are **requested**
To **help** sports players
Perform under **pressure***

*This Could **Make:***

Higher Scores

Another Fun Example

The Psychologists:

- Are Sometimes **hired**
- By The **military**

*The **Military:***

Requests Them

*To help **troops***

***Prepare** for and*

Recover** from **combat

Whoa:

***Big** names*

***Hard** tasks*

Summary

Well:

- It **Seems** that
- The Modern **Psychology**
- Is **Bulky**

***Weighing** a lot:*

*Of **mental** processes*

***Attempts** at:*

***Interpreting** behavior*

*Does Not **Sound** Easy*

***Labeling** people:*

Is usually

*Not **Received** Well*

And:

- We All **Know**

- That
- At any **time**
- **Anything** could **happen**

*There is **Not**:*

*A Lot of **Time**
To **Think** About **Things**
Life Moves By*

*Our **Processes**:*

*We **Know***

It is **Said** that:

- Psychology
- Is **concerned** with
- **Understanding** how the **mind**
- **Creates** emotions

*Sometimes it is **Better**:*

*To Leave it **Alone***

Psychology **Claims**:

- It can **help** people
- **Understand** their own **actions**

*Psychology **Claims**:*

*It can **help** people
Understand **other** people **better***

*Too Many **Cooks**
Spoils The **Broth***

If We:

*Don't **Like**
Someone's **Thought**
Then Hey
Why **Make**
A **Big Deal** About it*

*Too Many **Cooks**
Spoils The **Broth***

ENDING

So:

- People **Spend**
- A Lot of **Time**
- **Thinking** About
- Psychology

*I Don't Know **if**:*

*Psychology is **Accurate***

Or

*If They Even **Care***

When Military **Hires**:

- Psychology **Professionals**
- Then

*Do **psych** doctors*

*Act like **priests***

*Do **psych** doctors:*

Determine

Affects** from **battle

*And **war***

*This is **Article**:*

About Modern Psychology
