

# Object in The World

Author: Thomas Lloyd  
TheEvenMind

This is My **Article**:

- **Object in The World**

*It is **About**:*

*An **Object**  
Like  
In The **World***

We All **know**:

- **Object in The World**

*There are many:*

***Things**  
In the world*

*We might **think** of:*

***Objects**  
Like  
A toaster  
A car  
Or jewelry*

**Object in The World:**

- We **know** these things

*These **things**:*

***Objects**  
Were **Made***

*Mostly I Mean:*

*Man **Made***

To **Be**:

- Object in The **World**
- Is By
- To **Construct**

*So:*

*In This Article*

*I Talk **About***

*Object in The **World***

*Mostly I **Mean**:*

*To **Construct***

*Mostly I **Mean**:*

*Man **Made***

*Object in The **World***

## **Making An Object**

I Have **said**:

- To **Be**
- Object in The **World**
- Is By
- To **Construct**

*The **Verb**:*

*To **Construct***

***Verb** is **Action***

*And:*

*Mostly I **Mean***

*Man **Made***

**Making An Object:**

- Man **Made**
- Uses **Verb**
- To **Construct**

So:

*To **Construct**  
Object in The **World**  
Man **Made**  
Uses **Verb**  
To **Construct***

## Process Of

To **Construct**:

- Object in The **World**
- Needs **Metrics**

*These **Metrics**:*

*Are The **Parts**  
In The **Object***

We Use:

- Specific **Parts**
- For Specific **Object**

*For example:*

*Loaf of **Bread**  
Or A **Fabric**  
Like  
A **Weaving***

*Another **example**:*

*Christopher Columbus*

**Known:**

*Objects in The **World***

So:

*Process Of  
To **Construct***

*Object in The **World**  
Needs **Metrics***

*Specific **Parts***  
*For Specific **Object***  
***Metrics***

## The Metrics

To Construct:

- Object in The **World**
- Needs **Metrics**
- **Parts**

*I Mean like:*

*Man made **thing***  
*Like **object***

*Such would **include:***

***Metrics***  
*The **Metrics***  
***Parts***

For example:

- To **Be**
- An **Object**
- **Needs**

*Time **spent***  
*And*  
*Accumulated **same***  
*Or **sameness***

This is like:

- Qualities
- Traits
- Or Attributes

*Also:*

*By **description***

***Parts Assembled***  
*Over **time***  
***Time spent***

*And:*

*Accumulated **same***  
*Or sameness*  
*Collected **Similar***

**Parts Assembled:**

- Over **time**
- And **identifiable**

*So:*

***With** definition*

**These together:**

- **Parts**
- Used to
- **Construct** Object

*Object in The **World**:*

***Assembled***  
*Over **time***  
*By **construct***  
*Object in The **World***

**Thing Built**

*So:*

- Object in The **World**
- Is **Built**
- **Constructed**

*Assembled to:*

*Have **definition***  
*Object in The **World***

**Any object:**

- Like
- In the **world**
- Would **get**
- **Definition**

*It would **qualify**:*

*By **definition***

*By **description***

*Object in The **World***

*It would **be**:*

*Object in The **World***

*A **built** one*

*Object in The **World***

*By **construct***

*By **definition***

*Thing **Built***

## **Having Enough**

Then:

- Upon **ample**
- **Enough**
- Object in The **World**
- Thing **Built**
- By **Construct**

*When **qualified**:*

*Like **arrival***

*Object in The **World***

***Complete***

*Having **Enough***

## **Point**

Upon **arrival**:

- By **definition**
- Object in The **World**
- Having **Enough**
- Then **declared**

***Declared**:*

*Object in The **World***

*By **definition***

**Point** is:

- This would include
- The term
- **Fixed**

***Fixed:***

*Object in The **World***

*Like:*

***Stationed***

*Put*

*Placed*

As **such:**

- **Fixed**
- Put
- It would usually be
- By **choice**

*By **choice** is:*

***Deliberate***

*Object in The **World:***

*Is usually*

***Deliberate***

**Deliberate:**

- By **Choice**
- **Fixed**
- Object in The **World**

**Note**

Once **something:**

- Becomes **fixed**
- It is
- Object in The **World**

*As:*

*Object in The **World***  
*Then it*  
*Probably **cannot***  
***Do it again***

**Fixed:**

- Object in The **World**
- We call **permanent**

*So:*

***If such***  
***Fixed***  
*Then*  
*Object in The **World***

*As **such:***

***Fixed***  
*Object in The **World***  
*Then it might be*  
*Hard to **change***

It might be:

- **Hard to**
- Get **out of**

*For example:*

*People might **say***  
*No*

*People might **say:***

*It is already **fixed***

*People might **say:***

*It is **built on***  
***Depended on***  
*So don't **change** it*

***Fixed***  
*Object in The **World***

It might be:

- **Hard to change**

*Example:*

***Explorer*** Columbus

*We see him:*

*Still now*

*As*

*Object in The **World***

## Consequences

This **fixed**:

- Object in The **World**
- Is **limited**

*This is:*

***Conditional***

**Conditional** is like:

- Only pertaining to
- Certain **things**

*There is **no***

*Object in the **world***

*That **relates** to*

***All** things*

***Limited:***

***Conditional***

*Is like*

*Only **pertaining** to*

***Certain** things*

*There is a **lot** of:*

***Variety*** out there

*Object in the **world***

## A Category

So:

- As **limited**
- Hence **conditional**
- Then
- In a **category**

*It would **pertain**:*

*To a **category***

The **category** of:

- **That** thing
- Like
- That **object**
- Object in The **World**

*Limited is **not**:*

***Everything***

*Specific **Parts***

*For Specific **Object***

*Then **limited***

Therefore:

- It would only have
- **Access** to
- Certain **liberty**

***Liberty** of:*

***Such** category*

***That** category*

***It's** category*

## ENDING

So, then:

- We have **seen**
- **Definition**

***Definition:***

*To **construct**  
Object in the **world***

***Metrics or Parts:***

***Used**  
To **construct***

*Specific **Parts**  
For Specific **Object***

Then:

- **If**
- Object in the **world**
- **Limited** in category
- **What** is **available**

*In **such** category:*

***That** category  
**It's** category  
**Pertaining** to that  
**Type** of **object***

***What** is **available***

Well:

- **Look** on the **list**

*Examples would be:*

*A **warrior**  
An **outlaw**  
A **fabric**  
A **weaving***

***What** is **available***

*Well:*

***Look** on the **list**  
**Such** category  
**That** category  
**It's** category*

*Article is:*

*Object in The World*
